

Muhammad Abdullah Akmal

Senior Data Scientist | AI Engineer

✉ agfa.94@gmail.com ☎ [+447395582782](tel:+447395582782) 📍 Blackwater, England 🌐 [Portfolio](#) 🐙 [in](#) 📄 [Resume](#)

Summary

AI Engineer and Senior Data Scientist with 9+ years building production LLM, NLP, and computer-vision systems across healthcare, reinsurance, and enterprise SaaS. Shipped RAG pipelines, multi-tenant chatbots, and document-intelligence platforms serving multiple users and clients. Specialise in privacy-preserving, auditable AI — including GDPR-compliant architectures for regulated industries.

Skills

Language & Libraries

R, C++, Python, PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, OpenCV

LLM & GenAI

OpenAI, Gemini, Evals, Claude, LLaMA, Llamaindex, RAG Finetuning, LangChain, Weaviate, ChromaDB, pgvector

Cloud & DevOps

AWS, AzureML, Docker, Kubernetes, Jenkins, Github

Core NLP Tech

NLP, Computer Vision, NER, OCR, Deep Learning, Semantic Search

Tools & Workflow

JIRA, Confluence, Figma, Git, Agile/Scrum, Streamlit, FastAPI, Jupyter, Llamaindex

Experience

CyberliSmart

Lead AI Engineer

London, England

01/2025 - Ongoing

- Architected multi-tenant RAG chatbot platform on OpenAI + Weaviate with row-level tenant isolation, serving thousands of requests / day.
- Built explainability and audit layer (source attribution, query logging, eval harness) enabling enterprise compliance sign-off.
- Delivered computer-vision pipeline for Sony — object detection, instance segmentation, and mass estimation.
- Shipped generative-AI products including ad-creative generation and patent summarisation, reducing manual marketing turnaround from days to minutes.
- Implemented domain-specific NER and anomaly-detection pipelines, lifting F1 from 75 to **91** on Certificates and documents for diamonds.

Friendly

Lead Data Scientist

San Francisco, USA (Remote)

04/2019 - 01/2025

- Led data-science function of 4 engineers, 2 QA, 2 BD and 5 Data annotators, owning roadmap and delivery for more than 10 clients including GenRE, SwissRE, MunichRE, BMO, PPS, etc.
- Architected document-intelligence pipeline and document-content understanding pipeline (OCR + NER + summarisation) processing more than 5000/day; reduced manual review time by 80%.
- Built LLM-powered chatbot suite on LLaMA, OpenAI, and Gemini for insurance and healthcare clients, deployed to production.
- Improved NER F1 to 0.90 by migrating to transformer-based architectures; cut inference cost by 50%.
- Integrated and standardised 10+ heterogeneous client datasets, reducing schema inconsistencies by 25% and unlocking downstream capability.
- Designed AI-driven dashboards adopted by company and clients stakeholders for operational decisions.

Data Scientist

GameSessions

Sheffield, England

11/2017 - 04/2019

- Built predictive models for user engagement and game performance, hitting 90% accuracy.
- Shipped real-time KPI dashboards used by marketing teams to track.
- Optimised user-acquisition spend through cohort and channel analysis, lifting ROAS.

DFKI (German Research Center for AI)

Kaiserslautern, Germany

Associate Research

06/2015 - 07/2016

- Developed thermal-imaging computer-vision pipeline for anomaly detection in agricultural products.
- Applied clustering and supervised classification for defect detection, achieving 89 on custom fruit dataset.
- Co-authored IEEE-published research on document table recognition (see Publications).
